

WATER PRESSURE BOOSTER SYSTEMS

SERIES WPB

Series WPB

APPLICATION

Applications include commercial, industrial, and other installations requiring a boost in water pressure. The Water Pressure Booster System will efficiently provide a steady downstream pressure regardless of a varying flow rate and/or varying inlet pressure.

DESIGN FEATURES

- NSF/ANSI 61 & 372 certified system
- Professionally engineered components
- Compact design minimizes floor space
- Single source responsibility
- Factory assembled and tested

Certified to
NSF/ANSI 61 & 372
