

Posi-Boost

WATER PRESSURE BOOSTER SYSTEM

PENN PUMP & EQUIPMENT CO., INC

APPLICATION

Applications include commercial, industrial, and other installations requiring a boost in water pressure. The variable speed Penn Pump Posi-Boost System will efficiently provide a steady downstream pressure regardless of varying flow rate and/or varying inlet pressure. When multiple Posi-Boost units are piped and networked together they will operate as a coordinated multiplex system.

DESIGN FEATURES

- NSF/ANSI 61 & 372 certified system
- Expandable to multiplex system
- Professionally engineered components
- Compact design minimizes floor space
- Single source responsibility
- Factory assembled and tested
- 3-5 Day Quick Ship Option Available
- 240v/1Ph Options Available
