

WATER PRESSURE BOOSTER SYSTEMS

SUBMITTAL DATA

APPLICATION

Applications include commercial, industrial, and other installations requiring a boost in water pressure.

The Penn Pump & Equipment Company Water Pressure Booster System will efficiently provide a steady downstream pressure regardless of a varying flow rate and/or varying inlet pressure.

DESIGN FEATURES

- NSF/ANSI 61 & 372 certified system
- Professionally engineered components
- Compact design minimizes floor space
- Single source responsibility
- Factory assembled and tested
